# Studio Enterprise 2008

## DEVELOPING SMART CLIENT AND RICH INTERNET APPLICATIONS HAS NEVER BEEN EASIER

### Save development time with easy-to-use components

Drag-and-drop components equipped with smart tags, wizards, designers, and more. Our extensive design-time support saves you from having to write a lot of UI code.

### Consistently style your Smart Client and Rich Internet applications with ease

Take your applications to the next level in visual design with the new 2007 Microsoft Office system and Windows Vista UI themes. An entire application theme can be applied by setting one property value.

### Benefit from enhanced database application development

UI components can be bound to data sources without writing code. Replace the traditional ADO.NET dataset with ComponentOne DataObjects, and increase your application's performance. Access, scroll, and browse millions of database records instantly.

### Accelerate your development skills with a unified suite of components

Studio Enterprise is an integrated suite of development components that share a common framework. The consistent object models and documentation reduce the learning curve when developing across application platforms.

### Guaranteed most recent access to the latest components and controls

With an annual product subscription you receive updated components and controls throughout the year.

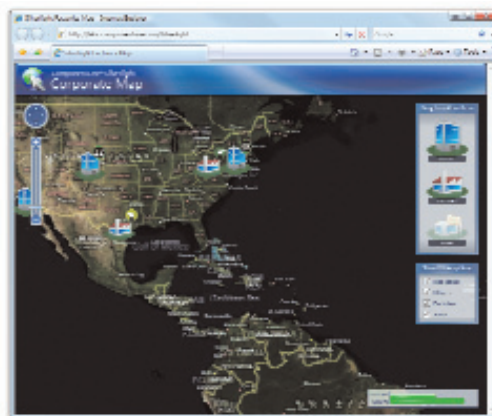

### Unparalleled platinum support

No matter how sophisticated your applications become, our unparalleled technical support will help to ensure your ongoing success.

ComponentOne has been a long-standing leader in the Microsoft Visual Studio component industry and a premiere Microsoft partner for more than 20 years. ComponentOne's flagship product, ComponentOne Studio Enterprise is the industry's broadest and most complete suite of development components for developing all layers of Windows, Web, and Mobile applications. ComponentOne products are supported and distributed in more than 35 countries worldwide and are used by Fortune 100 companies as well as small and medium-sized businesses.

## THE WIDEST RANGE OF COMPONENTS

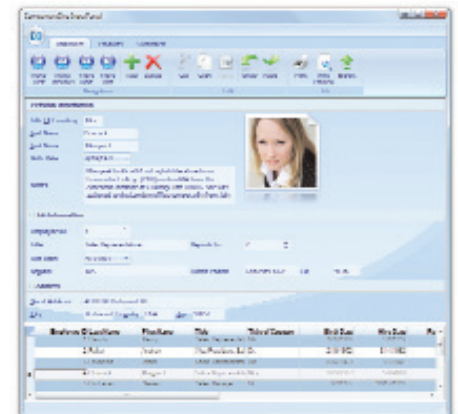

ComponentOne Studio Enterprise includes seven development platforms in one: Studio for WinForms, Studio for WPF, Studio for ASP.NET, Studio for Silverlight, Studio for iPhone, Studio for Mobile, and Studio for ActiveX. This award-winning suite of development components represents the widest range of developer components and services, including grids, charts, reports, schedules, data input, and more. Each studio is intelligently designed with common frameworks, libraries, and characteristics spanning all development environments. Targeting all application layers (data, presentation, reporting, navigation, and transformation) and all run-time environments, Studio Enterprise provides exactly what developers need to deliver the rich experiences users demand.

- Display rich, interactive geographical information using ComponentOne Maps
- Generate Rich Internet Applications (RIAs) with the 30+ Silverlight controls included in Studio for Silverlight

## Create polished, interactive data forms in minutes with ComponentOne InputPanel

- No code, data-aware input forms
- Automatic generation of accelerator keys and tab order
- Easily adjusted layouts—with flow management functionality

## STUDIO FOR ACTIVEX Build data-aware applications with over 35 legendary ActiveX controls

<b>Chart</b>	<b>True DataControl</b>	<b>True DBList Pro</b>	<b>VSVIEW Reporting</b>
<b>Query</b>	<b>True DBGrid Pro</b>	<b>VSFlexGrid Pro</b>	<b>VSSpell</b>
<b>SizerOne</b>	<b>True DBInput Pro</b>	<b>VSView Classic</b>	<b>WebChart</b>

“If you do Visual Basic development like I do, there's just no way to live without the ComponentOne suite of tools. ComponentOne has tools for Silverlight, WinForms, a highly customizable Office 2007 Ribbon toolbar, tools for ASPNET, tools for Windows Mobile, and much more! I highly recommend giving ComponentOne a try!” James Summerlin
